

Advance in Sailing

The Topper 6.4

Upgrading to a 6.4 rig ensures your boat's longevity, and prepares you for advancing into other competitive racing classes. This modification can be done at any time, and is a cost effective way to get more out of your Topper. Whether you have outgrown the 5.3 or are simply looking for a challenge, the components required are available whenever you need them.

What you'll need

All you will need to get started is the 6.4 radial-cut battened Mainsail and an extended Top Mast, priced together at **£875**.

There are also optional extras we would recommend to enhance the performance and improve your sailing experience, such as; an epoxy fibreglass Rudder Blade, an extra Collar (to raise the boom height) and a shorter Boom. These additional items would collectively cost over **£830**.

To purchase all of these upgrade items together the usual RRP would be over **£1700**. However, for a limited time only we are running a special offer to include all of the items outlined above with a saving of over **£500!**

6.4 Upgrade Bundle

- Battened Mainsail
- Extended Top Mast
- Rudder Blade, Collar & Shorter Boom.

SPECIAL PRICE
£1200.00 (inc. VAT)

If you have any further questions on upgrading your rig or would like to place an order, please contact Russ Dent via email or mobile.
