

topaz XENON

Performance Racer

The XENON is an excellent, high-performance two-person boat designed for hiking - but with the added bonus of a trapeze option.

The incredibly beamy hull measures in at 2m wide, allowing the crew to easily control the huge power source. An **elegant chined hull** further enhances her outstanding stability.

The impressive beam also makes for a very comfortable, spacious and uncluttered cockpit. A gnav system further increases the generous deck space and reduces cockpit clutter even further.

The powerful battened Mylar mainsail comes with a zip-reefing system as standard, allowing performance to be tuned to suit a wider variety of skill levels.

Topper's unrivalled TRILAM construction is used again here, meaning the boat will stand up to all the stresses of training and racing making the boat virtually maintenance free. It comes with an epoxy centreboard and rudders and the highest spec equipment is fitted as standard. The XENON offers unbeatable value for money in comparison to any club racing options and has been selected for the prestigious **Champion of Champion** event.

“Formidable style... Precise, well mannered and easy to drive upwind with good speed and excellent stability.”
